- 25X1A 1. [redacted] Comment. Major elements of the 6th Gds Tank Div are confirmed at the post [redacted]

25X1 [redacted] until mid-September. Other elements of the division are rather safely believed to be stationed at Werder-Markendorf. Numerous reports on transportation indicated that, since early July 1953, tank units were continually rotated between the training area and the post. During the preceding two years, the tank regiments of the division had stayed at Werder-Markendorf throughout the summer months.
